METHOD

What this is

This report rests on the complete public run of the All-In Podcast, from the first COVID episode in March 2020 to the Eric Weinstein interview on 26 August 2026. Nothing here comes from memory or from secondary coverage. Every claim traces to the show's own audio.

MEASURE	VALUE
Episodes in the feed	412
Episodes transcribed	402, or 97.6 percent
Words of transcript	6,905,158
Hours of audio covered	539
Chapter markers parsed	2,914 across 410 episodes
Guests indexed	69, matched to 111 appearances
Date range	15 March 2020 to 26 August 2026

The pipeline resolved the podcast feed for canonical metadata, matched each episode to its video, and pulled the machine transcript. Show notes were parsed separately, because All-In publishes timestamped chapter markers on almost every episode. Those markers form a topic index the hosts wrote themselves, which makes them better evidence than any classifier.

Read the limits before the findings

• Machines wrote these transcripts. Quotes appear as the recogniser heard them. Check them against audio before treating any as verbatim. Accuracy is poor before 2022, when the captions arrived lowercase and unpunctuated.

• Speaker labels are inferred. The captions carry no speaker tags. Attribution here comes from moments when one host hands the floor to another by name. That method is precise but sparse, covering roughly 3 percent of the show. Where this report names a host, it says so. Elsewhere it describes the show as a whole.

• Ten episodes have no transcript. Five have no captions at all. Five could not be matched to a video with confidence. Both sets appear in the gaps section rather than disappearing quietly.

THE SHOW

The shape of the thing

All-In began as four friends comparing notes during a market panic. It now interviews sitting cabinet secretaries. The format barely changed; the access changed completely.

Output grew sharply. The show ran 16 episodes in 2020 and 46 in 2021, then held near one a week through 2024. From 2025 it roughly doubled, to 107 episodes in 2025 and 79 in the first eight months of 2026, as Summit talks, the Washington series and standalone interviews joined the main feed. The roundtable is no longer the whole show. It is the anchor of a small network.

THE ROUNDTABLE

Four hosts, one docket

The original format. A news docket worked through in order, with chapter markers published in the notes. Here the hosts disagree with each other, which makes these episodes the best evidence of what any of them actually thinks.

THE INTERVIEW

One guest, one subject

Dominant from 2024 onward. Cabinet officials, founders, senators, Nobel laureates. Valuable for access, weaker as evidence of the hosts' own views, because the guest holds the floor.

That distinction matters for anyone mining the show for opinion. On interview episodes most of the words belong to someone else. The roundtables carry the argument.

TOPICS

What they argue about

Classifying all 2,914 chapter markers by subject shows what the show covers, and one unmistakable trend inside it.

THEME	EPISODES
Politics and policy	321
Big tech and antitrust	208
China and geopolitics	207
AI and machine learning	188
Society, cities and culture	150
Markets and macro	140
Venture and startups	135
Energy and climate	98
Crypto and web3	56
Science, biotech and health	55

Politics leads on volume because almost every roundtable touches it. The trend underneath tells a different story.

THE TREND

AI ate the show

Measured as a share of each year's tagged chapter segments, AI grew from a rounding error into the largest subject on the podcast. This is the clearest signal in the corpus.

2020 TO 2022

AI holds at 1 to 2 percent of tagged segments. The show belongs to COVID, markets, antitrust and the culture war. Crypto peaks here and never regains the share it lost.

2023

AI jumps to 14.3 percent. ChatGPT and the Sam Altman regulatory tour arrive together. The argument about open models against closed ones starts now and becomes the most cited framework in the whole corpus, appearing in 51 episodes.

2024

21.7 percent. The subject shifts from what the models can do to who is paying for them. Nvidia, compute and the buildout take over.

2025

23.7 percent, and the binding constraint becomes physics. Power, grid and gigawatts appear alongside datacenters in 14 episodes, against one in 2023.

2026

33.8 percent. One third of everything the show discusses. The energy constraint reaches 21 episodes in eight months, and the fight between doomers and accelerationists becomes a fixture.

Politics runs the opposite way. It spikes with the calendar rather than trending: 38.6 percent of segments in 2020, 8.8 percent in 2022, 21.4 percent in 2024, and 8.7 percent in 2026. China follows its own cycle, peaking at 15.8 percent in 2022 and holding near 12 percent since. For the current state of the AI argument, the 21 August 2026 roundtable is the cleanest single example.

THE FOUR

How to tell their arguments apart

The show lasts because the four hosts fail in different directions. Each has a characteristic move. Name the move and you can predict how any new topic will divide among them.

Chamath Palihapitiya

Argues from capital structure and incentives. Reaches for the balance sheet, the cost of capital, and the question of who is paid to hold which view. Prone to the sweeping systemic claim, and the likeliest of the four to declare a regime over.

David Sacks

Argues from precedent and process. The most disciplined debater on the show, and the one most likely to separate the legal question from the political one. His signature move concedes the narrow point and wins the broad one.

David Friedberg

Argues from mechanism. He wants the underlying process, the unit economics or the biology before he accepts a conclusion. He runs the science segment, and the others hand him the floor more often than anyone else.

Jason Calacanis

Argues from the operator's chair and runs the docket. Pushes for the concrete proposal and the founder's view. He supplies the show's friction, a structural role as much as a personal one.

One episode shows the division cleanly. On the Texas border dispute, 26 January 2024, Sacks separated the courts from the public: Governor Abbott is "probably going to lose in a court of law, but he's going to win in the court of public opinion." Calacanis went straight to a proposal, arguing for an orderly, merit-based points system he notes he has advocated many times. Same facts, different instinct. One reads the politics; the other writes the policy.

Guard against over-reading this. Because attribution depends on explicit handoffs, Friedberg accumulates the most attributed passages, 506 of 1,298, largely because the others say his name when they want the science explained. That measures the show's choreography, not who talks most.

ARGUMENT

The AI argument, in the order it happened

The show's AI coverage is not one debate but four, arriving in sequence. Each new constraint displaced the last as the thing worth arguing about.

1. Capability, 2023. Can the models do the thing, and who gets to regulate them. The show treats the Altman regulatory tour with open suspicion, and regulatory capture becomes its default explanation for incumbent enthusiasm about rules. See E129, 19 May 2023.
2. Capital, 2024. Who funds the buildout, and do the returns justify it. Friedberg's framing on 16 February 2024 is the house position in miniature: the buildout is "almost like building out an entirely new internet," and you must build the infrastructure if you believe the productivity gains are coming.
3. Physics, 2025 to 2026. Power, grid interconnects and gigawatts become the binding constraint. This is the fastest growing subject in the corpus, rising from one episode in 2023 to 21 in the first eight months of 2026.
4. Circularity and belief, 2026. The argument turns to whether the deals finance themselves, how long a GPU should be depreciated, and whether doom or acceleration is the more disciplined stance. Doomer and accelerationist framing appears in 13 episodes, all from 2025 onward.

> *"The most important piece of financial logic that we have to break is this idea that there is always a put."*
>
> ALL-IN, 26 APRIL 2025, MACHINE TRANSCRIPT

That line shows the show at its best and at its most exposed. Asking who underwrites the downside is its sharpest recurring habit. The same instinct made the hosts early to several calls that took years to pay off, and early looks exactly like wrong until it stops.

ARGUMENT

Markets, and the recession that arrived late

Recession talk shows the pattern most clearly. It appears in 57 episodes, concentrated in 29 episodes during 2022, then thinning to 10 in 2023, 9 in 2024 and 5 in 2025.

Judge it fairly by holding two facts together. The 2022 warnings about multiple compression, burn rates and the end of free money were correct and useful; startups that acted on them survived. The accompanying macro call, that a broad recession was imminent, missed on timing. The show reads mechanisms better than it reads clocks. That failure is common and forgivable, and it is still a failure.

Sacks made the sharpest early version of this asymmetry on 21 May 2020, recalling his own line that under-reaction caused the pandemic and over-reaction would cause the depression. Whatever one makes of the conclusion, the structure, that a response can cost more than the shock, became the template for much of the show's later economic reasoning.

ARGUMENT

China, the fixed point

China appears in 207 episodes, and the underlying view has moved less than any other major theme. The show treats competition between the United States and China as the organising fact of the century, and it treats technology policy as downstream of that.

Ukraine and Russia prove the rule by exception. The war appears in 105 episodes, peaking at 30 in each of 2022 and 2023 before falling to 8 in 2026, starting with the emergency episode of 24 February 2022. Attention faded; the framework held. On China the hosts are consistent to the point of predictability, which makes the rare disagreements among them unusually informative.

SEGMENT

Science corner, the most underrated feature

The science segment appears by name in 61 episodes. Apart from the docket itself, it is the most consistent recurring feature in the corpus, and the part of the show least shaped by the politics of the week.

Its function is structural. When the roundtable reaches the point where the argument is really about values, the segment resets the conversation onto a mechanism someone can explain. Readers who want durable knowledge rather than opinion will find the highest density of it here, across gene editing, agriculture, longevity, fusion and quantum computing.

NUGGETS

The operating vocabulary

Counting concept usage across all 402 transcripts separates the show's working vocabulary from the ideas it mentioned once. These are the tools the hosts reach for by reflex.

FRAMEWORK	USES	EPISODES
Open source against closed models	206	51
Science corner	150	61
Regulatory capture	126	54
First principles	122	81
ZIRP and the free money era	99	58
Deep state	96	40
Total addressable market	71	32
Soft landing	65	32
Cost of capital	62	34
Power law returns	56	23
Founder mode	55	13
Moat and durable advantage	51	34
Product market fit	49	27
Burn rate and default alive	47	18
Scaling laws and test-time compute	43	22
Debt spiral and entitlements	41	25

Two patterns stand out. First principles appears in 81 episodes, more than any other framework, which states the show's self-image: reason from the mechanism and distrust the consensus. Founder mode concentrates instead, 55 uses across only 13 episodes, the signature of a phrase that arrives, gets argued about hard, and recedes.

NUGGETS

Five ideas worth stealing

01 Ask who is paid to hold the view. Regulatory capture is the show's most reused tool. Applied to incumbents who ask to be regulated, it is usually the right first guess.

02 Separate the legal question from the political one. This is the show's most reliable move, and the one that most often predicts an outcome the commentary got wrong.

03 Price the capital, not the story. Cost of capital and ZIRP recur because the hosts treat the rate environment as the hidden variable behind most business narratives of the past decade.

04 Name the constraint that binds. The AI arc is the case study: capability, then capital, then power. Identifying which constraint binds now is most of the analysis.

05 Default alive beats default clever. Burn rate talk concentrates in the 2022 downturn episodes, and the advice never varies. Control the runway first; optimise second.

ACCESS

Who gets the microphone

Sixty-nine indexed guests account for 111 appearances. The distribution reveals the show's centre of gravity.

GUEST	APPEARANCES	WHY THEY RECUR
Brad Gerstner	9	The house buy-side voice, brought in for AI capex, big tech earnings and positioning.
Elon Musk	4	Interviewed on the show and at the Summit, and separately the most discussed person in the corpus.
Tucker Carlson	4	Including a Summit debate against Mark Cuban.
Gavin Baker	4	Semiconductors, compute and the annual predictions episodes.
Scott Bessent	4	Macro and fiscal policy, mostly through the Washington series.
Bill Gurley	3	Whose regulatory capture argument became load-bearing for the whole show.
Keith Rabois	3	Founder quality and city politics.
Sam Altman	3	Arriving exactly as AI took over the agenda.

Recurrence tracks usefulness to an argument rather than celebrity. Gerstner appears more than twice as often as anyone except Musk because the show needs a public-markets counterweight to four private-markets investors.

The political guest list runs genuinely wide, from Bernie Sanders to Ted Cruz, and it includes four 2024 presidential candidates interviewed at length. The tone is not symmetric. The show's framing favours the deregulatory case, and the most adversarial interviews tend to be with guests on the left. Weigh the roster and the questioning separately.

EVIDENCE

What moved, and what only looked like it

A long corpus lets you check whether a stated position held. Three findings, stated with the confidence the evidence supports.

Genuinely moved

- • The AI constraint. Capability to capital to power, in that order, traceable by date.
- • SPAC enthusiasm. Concentrated in 2020 and 2021, gone by 2022. The vehicle that built the show's early reputation quietly stops being advocated.
- • Crypto's share of attention. Peaks in 2021 and 2022, falls to roughly 3 percent of segments, and survives mainly as a policy topic.

Only looked like it

- • China. Attention rises and falls with events; the framework has not changed since 2020.
- • Regulatory capture. New targets every year, identical analytic move since 2020.
- • Politics. Volume tracks the electoral calendar rather than any evolution in view.

FINDING

The missing falsifier

Across 6.9 million words the hosts rarely name in advance the evidence that would change their minds. Predictions are frequent and confident. Stated conditions for being wrong are rare.

This is the widest gap between how the show describes its method and how it argues. A first-principles claim carries a falsifier by construction: if the mechanism runs the other way, the conclusion fails. The show reaches for the mechanism constantly and for the falsifier almost never.

Treat this as a reading instruction rather than an indictment. When a host makes a confident call, the useful question is the one the episode skips. What would have to happen for this to be wrong, and by when? Ask it yourself, because the tape will not.

SELECTED

Lines worth keeping

Short excerpts, dated, from machine transcripts. Check them against audio before quoting them anywhere that matters.

> *“He's probably going to lose in a court of law, but he's going to win in the court of public opinion.”*
>
> SACKS ON THE TEXAS BORDER DISPUTE, 26 JANUARY 2024

> *“The compute build-out is underway, but are we seeing application and productivity gains associated with the capability of that compute?”*
>
> FRIEDBERG, 16 FEBRUARY 2024

> *“The most important piece of financial logic that we have to break is this idea that there is always a put.”*
>
> ALL-IN, 26 APRIL 2025

The show also carries a large body of running jokes, nicknames and a closing theme song. Those explain much of why people listen, and this report leaves them where they belong, in the episodes.

LIMITS

The gaps, stated plainly

Ten of 412 episodes have no transcript. Five have no automatic captions, verified one by one rather than assumed. Five could not be matched to a video safely enough to use.

- • No captions available. E57 on Omicron and the resignation wave, December 2021; E58 on November CPI, December 2021; and three others from the 2021 run.
- • Unmatched to a video. E0, the March 2020 test episode; E28 on Archegos, April 2021; E34 on the lab leak, May 2021; E76.5, April 2022; and two 2023 candidate interviews.
- • Consequence. Coverage of late 2021 runs slightly thinner than the rest. No conclusion in this report rests on those episodes alone.

Two further limits deserve statement. Transcription before 2022 is poor enough that quoting from that era without checking the audio is unsafe. And speaker attribution reaches only about 3 percent of the show, which is why this report describes host differences qualitatively and quotes them sparingly instead of publishing speaker statistics it cannot support.

PRACTICAL

Using the archive, and keeping it current

The corpus sits on disk and answers questions in seconds. That is the point of building it this way rather than listening to 539 hours.

- • Search the full text to find every episode where a term appears, with timestamps and dates.
- • Read a theme digest in date order to watch a position develop instead of sampling one episode.
- • Start from the chapter index when you want a topic rather than an episode. The hosts' own markers beat any summary.

One command keeps it fresh

Running ./update.sh refetches the feed, pulls transcripts for anything new, rebuilds every statistic in this report, regenerates the Word file, the PDF and the artifact, and reports what changed. Episode counts, theme classification, guest matching and every number above update automatically.

The narrative does not update itself. When a new episode lands, the numbers move and the argument stays put until someone reads the episode and writes the paragraph. A report that goes stale in silence would be worse than one with a known manual step.

APPENDIX A

Episode index

All 412 episodes in the public feed, oldest first.

DATE	EP	TITLE	GUESTS
2020-03-15		E0: COVID-19 Political, Economic & Social Ramifications featuring David Friedberg	
2020-03-19		E1: US Response to COVID-19 & Impact on Startups, Venture Capital & Public Markets with David Friedberg	
2020-04-11		E2: Rebooting the economy, understanding corporate debt, steps to avoid a depression & more with David Sacks	
2020-05-21		E3: Modern Cold War between US & China, economic recovery, potential mass migration out of San Francisco, pandemic politicization & more with David Sacks & David Friedberg	
2020-06-20		E4: Politicizing the pandemic, Police reform, Biden's ideal VP, Twitter vs. Facebook on free speech & more with David Sacks & David Friedberg	
2020-07-11		E5: WHO's incompetence, kicking off Cold War II, China's grand plan, 100X'ing America's efficiency	
2020-07-31		E6: Big Tech antitrust aftermath, potential effects of an M&A clampdown on Silicon Valley & more	
2020-09-09		E7: California's collapse, how SPACs are opening the markets for growth stocks & more	
2020-09-19		E8: TikTok + Oracle, how privacy loss will impact society, economy & COVID outlooks for 2021 & beyond, California wildfires & more	
2020-10-03		E9: Trump has COVID, First debate reactions, Coinbase letter response & more	
2020-10-16		E10: Twitter & Facebook botch censorship (again), the publisher vs. distributor debate & more	
2020-11-04		E11: Election Night Special featuring Phil Hellmuth, Bill Gurley, Brad Gerstner & more!	Brad Gerstner, Bill Gurley, Phil Hellmuth
2020-11-11		E12: Biden wins, Pfizer vaccine, markets rip, Trump's next act, COVID endgame scenarios & more	
2020-11-25		E13: SPACsgiving Special! More promising vaccine news, innovation vs. regulation, reforming higher ed, morality of challenge trials & more	
2020-12-04		E14: Salesforce acquires Slack, DeepMind's AlphaFold breakthrough, Trust Fund Socialists & more	
2020-12-18		E15: "The Besties" All-In's inaugural award show covering the best, worst & most memorable of 2020	
2021-01-08		E16: Reflecting on the riots at the US Capitol, plus: Georgia runoff elections, vaccine distribution & more	
2021-01-11		E17: Big Tech bans Trump, ramifications for the First Amendment & the open Internet	
2021-01-23		E18: Inauguration talk, breaking down the $1.9T stimulus, the case for recalling Gavin Newsom & more	
2021-01-30		E19: Breaking down Robinhood's GameStop decision: Why did it happen and how can it be prevented in the future?	

DATE	EP	TITLE	GUESTS
2021-02-03		E20: Robinhood wrap up, Insiders vs. Outsiders, California's failing report card & how to fix it	
2021-02-06		E21: Media misalignment, subjects controlling narratives & more with bestie guestie Draymond Green	Draymond Green
2021-02-13		E22: Reflecting on the Robinhood situation with Bestie Guestie Vlad Tenev	
2021-02-20		E23: Radical DAs, breaking down FB/Google vs. Australia, sustained fear post-vaccine & fan questions!	
2021-03-06		E24: Markets trend down, political manipulation via COVID "Zeroism," stimulus breakdown, biological Patriot Act	
2021-03-13		E25: Biden's vaccine mandate, "equity" in distribution, NFT speculation, impact of inflation & more	
2021-03-20		E26: State of Venture Capital, plus fan questions on longevity, decentralization & quantum computing	
2021-03-27		E27: The Great Inflation Debate, Amazon gets spicy on Twitter, rethinking supply chains & more	
2021-04-01		E28: Current state of public & private markets, Archegos debacle, US debt issues, wealth tax & more	
2021-04-17		E29: Coinbase goes public, direct listings vs. IPOs, portfolio management, unions & more with Bestie Guestie Brad Gerstner	Brad Gerstner
2021-04-23		E30: Ramifications of Biden's proposed capital gains tax hike, federal budget, India's COVID surge, founder psychology & more	
2021-05-01		E31: Post-vaccination virtue signaling, pandemic lessons, immigration, Caitlyn Jenner for CA Governor, Big Tech earnings & more	
2021-05-13		E32: Behind the scenes of Elon hosting SNL, CDC failures, America's real-time UBI experiment, post-COVID boom in jeopardy & more	
2021-05-22		E33: Apple's hypocrisy, America's math failure, crypto's regulatory correction, Clubhouse's future, UFOs & more	
2021-05-31		E34: Wuhan lab leak theory, India's "traceability" law, Coinbase's fact check, Big Tech's Hollywood takeover	
2021-06-13		E35: Biogen's controversial Alzheimer's drug approval, the billionaire space race, real estate, Bitcoin & more	
2021-06-18		E36: New FTC Chair, breaking up big tech, government silent spying, Jon Stewart, wildfires & more	
2021-06-25		E37: NYC rejects far-left mayoral candidates, new developments in lab leak theory, Apple's App Store breakup potential & more	
2021-07-03		E38: Bestie brawl, Robinhood's $70M fine & S-1, Delta variant, future of the political parties, FTC takes losses against big tech & more	
2021-07-09		E39: West coast super drought & climate crisis, Nuclear virtue signaling, chaos in SF & more	
2021-07-16		E40: A Bestie gets COVID, Delta breakthrough, Billionaire Space Race & more	
2021-07-23		E41: Vaccine policy, Big Tech, DeepMind's latest breakthrough, wealth creation, opportunity & more

APPENDIX B

Guest index

Antonio Gracias (recurring)

Valor Equity Partners | Growth investing, operations

Summit AMA and election-data episodes.

Balaji Srinivasan (recurring)

Angel investor, ex-Coinbase CTO | Crypto, decentralization, network states

Long-form guest on decentralization and exit-over-voice arguments.

Bill Gurley (recurring)

Benchmark | Venture, regulatory capture, marketplaces

Recurring guest whose regulatory-capture argument became a durable frame on the show.

Brad Gerstner (recurring)

Altimeter Capital | Public and growth tech investing

The most frequent bestie guestie. Brings buy-side framing on AI capex, Big Tech earnings and portfolio positioning.

Bryan Johnson (recurring)

Blueprint | Longevity

Longevity protocol conversations.

Elon Musk (recurring)

Tesla, SpaceX, xAI | Technology, manufacturing, free speech

Interviewed on the show and at the Summit; also the single most discussed person in the corpus.

Francis Suarez (recurring)

Miami | Cities, crypto

Building a tech-friendly city.

Gavin Baker (recurring)

Atreides Management | Public tech, semis, AI compute

Returns for prediction episodes and semiconductor deep dives.

Howard Lutnick (recurring)

Cantor Fitzgerald / Commerce | Markets, trade

DC series appearances.

Keith Rabois (recurring)

Khosla Ventures | Venture, operating, cities

Recurring bestie guestie on founder quality and SF politics.

Phil Hellmuth (recurring)

Professional poker | Poker

Recurring friend of the pod on election-night and poker episodes.

Ray Dalio (recurring)

Bridgewater | Debt cycles, macro

Returns on the debt spiral and long-term cycle thesis.

Ro Khanna (recurring)

US House | Tech policy, industrial policy

Recurring Democratic voice on tech and manufacturing.

Scott Bessent (recurring)

US Treasury | Macro, fiscal policy

Appeared around the DC series.

Tucker Carlson (recurring)

Independent media | Media, politics, foreign policy

Multiple appearances including a Summit debate.

Adena Friedman

Nasdaq | Public markets

IPO markets and listings.

Alex Karp

Palantir | Defense software, AI

Argues the West-must-win case for defense software.

Ari Emanuel

Endeavor | Media, entertainment

Hollywood and AI.

Bernie Sanders

US Senate | Inequality, labor, healthcare

Rare left-wing guest, sharpest ideological contrast on the show.

Bill Ackman

Pershing Square | Activist investing

Market views and activism.

Changpeng Zhao

Binance | Crypto

Post-prison account of Binance.

Charles Koch

Koch Inc. | Industrial conglomerates

How Koch was built.

Chase Koch

Koch Inc. | Industrial conglomerates

Next-generation Koch leadership.

Chris Christie

Former NJ Governor | Politics

2024 presidential candidate interview.

Chris Dixon

a16z crypto | Crypto, web3

Crypto thesis conversations.

Chris Wright

US Energy Department | Energy policy

American energy strategy.

Coleman Hughes

Writer | Race, policy

Colorblindness debate.

Dan Dreyfus

Critical minerals | Supply chains

Copper and the mineral bottleneck.

Dean Phillips

US House | Politics

2024 presidential candidate interview.

Demis Hassabis

Google DeepMind | AI research, AGI

On AGI timelines and world models.

Draymond Green

NBA | Sports, media

Sports and culture crossover.

Eric Schmitt

US Senate | Politics

Policy interview.

Eric Weinstein

Thiel Capital | Science, institutions

On stagnation in physics and institutional capture.

Garrett Langley

Flock Safety | Public safety, surveillance

Defends camera networks against surveillance criticism.

JD Vance

US Senate / Vice President | Politics, industrial policy

Interviewed during the political cycle.

Jacob Helberg

Hill & Valley Forum | US-China tech competition

Tech and national security.

Jared Isaacman

Shift4, Polaris Dawn | Commercial space

Spaceflight and NASA policy.

Jared Kushner

Affinity Partners | Middle East, investing

Diplomacy and investment.

Jeffrey Sachs

Columbia University | Foreign policy, development

Summit conversation on US foreign policy.

Jensen Huang

Nvidia | Semiconductors, accelerated computing

Summit conversation on compute demand and the AI buildout.

Joe Manchin

US Senate | Bipartisanship, energy

Term limits and the centrist case.

John Fetterman

US Senate | Politics

The maverick Democrat interview.

John Martinis

Quantum computing | Quantum

Nobel laureate on quantum progress.

John Mearsheimer

University of Chicago | Realist foreign policy

Great-power politics at the Summit.

Jonathan Haidt

NYU | Social psychology, youth mental health

The Anxious Generation thesis.

Larry Summers

Harvard, ex-Treasury | Macroeconomics, inflation

Counterweight voice on inflation and fiscal policy.

Marc Andreessen

a16z | Technology, techno-optimism

Big-picture technology and political realignment.

Maria Corina Machado

Venezuelan opposition | Democracy, Venezuela

Nobel Peace Prize winner interview.

Mark Cuban

Cost Plus Drugs | Business, healthcare, politics

Debated Tucker Carlson at the Summit.

Michael Kratsios

White House OSTP | Science policy

Administration science agenda.

Molly Bloom

Author | Poker

The Molly's Game account.

Nate Silver

Silver Bulletin | Forecasting, elections

Election modeling and risk.

Naval Ravikant

AngelList | Startups, philosophy

Wealth creation and leverage.

Nikesh Arora

Palo Alto Networks | Cybersecurity

Security and SaaS at the Summit.

Orlando Bravo

Thoma Bravo | Private equity, software

The software buyout playbook.

Palmer Luckey

Anduril | Defense technology

Defense primes, autonomy and procurement reform.

Pete Buttigieg

US Transportation Department | Politics, infrastructure

Democratic counterpoint interview.

Rahm Emanuel

Former Ambassador / Mayor | Foreign policy, politics

Democratic foreign-policy perspective.

Rand Paul

US Senate | Libertarian policy

Spending and civil liberties.

Reid Hoffman

Greylock, LinkedIn | AI, networks, politics

Provides the show's most direct liberal tech counterpoint.

Robert F. Kennedy Jr.

Candidate / HHS | Politics, public health

2024 presidential candidate interview.

Roelof Botha

Sequoia Capital | Venture

Sequoia's stewardship and venture cycles.

Sam Altman

OpenAI | Frontier AI, regulation

Appeared as AI moved to the center of the show's agenda.

Ted Cruz

US Senate | Politics, regulation

Inauguration-series interview.

Thomas Laffont

Coatue | Public and private tech

AI IPO wave and market structure.

Tony Robbins

Author, coach | Performance, wealth

Peak performance and psychology.

Triple H

WWE | Entertainment

WWE's evolution and live entertainment.

Vinod Khosla

Khosla Ventures | Deep tech, AI, energy

Contrarian long-horizon technology bets.

Vivek Ramaswamy

Strive / candidate | Politics, ESG

2024 presidential candidate interview.
